

About me

I am a Junior Full-Stack Developer seeking a dynamic and innovative company where I can grow both professionally and personally.

I recently completed a bootcamp in Full-Stack Web Development, which provided me with a solid foundation in HTML, CSS, JavaScript, React, and Node.js.

Eager to keep learning new technologies, I'm also passionate about digital drawing and regularly use Photoshop and Illustrator to edit photos of my pets.

MASSIMILIANO TERAMO

JUNIOR FULL-STACK WEB DEVELOPER

Work Experience

- 09/21 / Present ● **IDENTITY VERIFICATION ANALYST** - Mitek Systems - Leeds
Mitek is a world leading digital access company, providing high level of control, deployment ease and operation. My role is essential for the company to provide high quality services to customers: I analyze from 300 to 400 documents per day, proofs of address and proofs of identity, to ensure their authenticity and report any fraud, as quickly as possible.
- 2017 / 2021 ● **HOSPITALITY SECTOR (Concierge - Store Assistant)** - Double Tree by Hilton / Sport Direct - Leeds
I provide high standard of customer service both working as a concierge in one of the most prestigious hotel chain and as a store assistant, (welcoming guests, managing the car parks, doing the extra-mile for the customers' satisfaction.
- 2017 ● **WEB MARKETING ASSISTANT** - Searchpoint.uk - Leeds
I went beyond the required target in terms of number of Google Plus and Google My Business customer pages created per day, I was also in charge of the contents and of the graphic side of the pages, creating Logos and backgrounds using Gimp 2.0.
- 2016 ● **WEB DESIGNER - COMMERCIAL MANAGER** - Digitaly.srl - Italy
I improved both the company website design, coding in HTML and CSS and its visibility applying SEO principals. During this work experience I learnt about accounting supporting the accountant office in terms of managing and storing clients' invoices and orders.
- 2015 ● **WEB DESIGNER - SEO ASSISTANT** - E-mediaweb.it - Italy
I gave an important contribution building websites in HTML and CSS, applying also SEO principales to improve the visibility of the websites on Google. I learnt how to manage a CMS for e-commerce and how to edit products pictures using Adobe Photoshop and Illustrator.
