About me

I am a Junior Full-Stack Developer seeking an innovative and collaborative environment where I can grow both professionally and personally, while contributing to the achievement of the company's goals.

I successfully completed a Full-Stack Web Development bootcamp, where I developed solid knowledge of programming languages and frameworks such as HTML, CSS, JavaScript, React, and Node.js. I am now eager to put my skills into practice and take the next step in my career.

With a creative background and a passion for web and digital design, I am a quick learner who regularly uses Photoshop and Illustrator for personal projects. I have also enhanced my graphic design skills through various online learning platforms.
